

THE RIGID DIFFERENCE

OPTICS

The Hybrid, Specter® and Hyperspot™ optics capture the maximum amount of light rays emitted from the LED and direct it in to forward projecting formulas that outshine the competition.

HYBRID

- Spot or Flood configuration
- Combination of lens and reflector
- 93%+ efficiency
- Distance (10° Spot)
- Broad beam (25° Flood)
- Great for all around distance

SPECTER

- Wide or Driving configuration
- 45° spread horizontal
- No optic lens
- Minimal light waste
- Allows for more LEDs in same housing
- Widest of all patterns

HYPERSPOT

- 5° ultra-narrow concentrated Spot beam pattern for long distance applications
- Patent pending aperture system blocks unused light for a clean beam
- Highest intensity per watt or square inch on the market
- Maximum distance

LOW POWER CONSUMPTION!

E-SERIES™

The linear, sleek E-Series™ LED light bars are designed for long distance lighting. This light provides excellent visibility on the road while consuming a low amount of power. This is also available with the diffused lens for scene lighting. Available in Flood, Spot or Combo beam patterns, and it comes in various lengths ranging from 4" to 50".

SR-SERIES®

The Rigid Industries® SR-Series® LED light bars are similar to the E-Series™, however, they are designed in a single row for a slimmer look. Though only half the footprint of the E-Series™, the SR-Series® emits up to 75% of its output. Lights are available in various lengths ranging from 6" to 50".

D-SERIES®

The Rigid Industries® Dually® and D2™ LED auxiliary lights perform well when high intensity light is needed and space is limited. The compact 3"x3" housing provides solutions for a broad spectrum of lighting needs.

D-SERIES HEAVY DUTY

Vibration Isolator

Drilling Site Work Truck

The A-Series™ LED accessory light by Rigid Industries® is the small (3") light that shines bright. Available in several different colors and housing variations. Though compact, the A-Series™ emits up to 400 lumens. This is a great option for compartment and small area lighting.

Vibration Isolator

Q-SERIES™

With four times the footprint of the D-Series®, the Rigid Industries® Q-Series™ heavy duty light was specifically designed and engineered to provide high intensity LED light to heavy duty equipment. It's vibration isolator provides protection from extreme vibration and reduction of bouncing beam (JDQ53.3 Heavy Duty Equipment Vibration Spec.) The powerful, yet energy efficient Q-Series™ is perfect for lighting large areas.

The apex of form and function, the RDS-Series™ takes our flagship E-Series lights and gives it a gentle arc for increased light spread. Featuring the most powerful, yet efficient LED optics system on the market today, the patented Hybrid technology captures the maximum amount of light emitted from the LED while utilizing a low amount of power. Available in various lengths ranging from 20" to 54".

A-SERIES™

SR-M® & SR-Q®

These compact and versatile LED lights provide big power in a small package that can be installed virtually anywhere. The patented Hybrid optics system captures the maximum amount of light emitted from the LED and projects it exactly where you need it. With cast aluminum housings, virtually unbreakable polycarbonate lenses and a limited lifetime warranty, you are assured years of trouble-free commercial operation.

RDS-SERIES™

FLUSH MOUNTS

These models are designed to be recessed on to vehicles and equipment where protrusion isn't wanted. With this, your light will not extend ¼" past the mounting surface. In combination with our compact lights, the flush mounts provide a less obstructive setup for effective area lighting.

Available for D-Series®, SR-M® and SR-Q®.

ANGLED FLUSH MOUNTS

15° for down and side angles

ACCESSORIES

HALO TORCH

Part #	Description
30120	800 Raw Lumen Halo Torch
MODES: Low, Medium, High, Strobe, SOS	

Includes:
• 1 - 110V Wall Charger
• 1 - AC/DC Cigarette Charger Adapter
• 1 - 18650 2400Mah Li-Ion Battery (rechargeable)

BACK UP KIT
