

PRODUCT RELEASE

Product Release - December 2019 The New "ReadyFit" LED BULB KIT

Identical connection system to halogen bulbs

STARR Lighting understands that their traditional LED Bulb Kit, the Evolution 4000, may not physically fit all vehicles. There have been some instances of the aluminum base hitting the plastic molding of the headlight, stopping the bulb from locking and securing into place. For this reason STARR Lighting has launched a brand new range of LED bulbs called Ready Fit.

These new bulbs share an identical connection system to the halogen bulbs they are going to replace, meaning there is no extra wiring or modules to fit into the headlight. This range really is as simple as removing the old halogen bulb and replacing it with the new LED bulb.

This range will replace the Driverless 3600 range as they share the same specifications at 1800 lumen per bulb but the Ready Fit mounting options are far superior. Additionally, CANbus electronics are now built-in, eliminating the need an external kit to solve flickering and/or dashboard error messages that occur in some vehicles.

Part No.	Bulb Type	Description
STARR-H1LED3600R	H1	H1 Ready Fit LED Bulb Kit 12/24V 6000K

LED Bulb Kit Specifications

Lumen Output:	1800 per bulb
Colour Temp:	6000K
Power:	Low 18W, High 18W DC
Voltage:	12-24V
Operating Temp:	-40° / +80° C (130° Max)
IP Rating:	IP65

- Not approved for SAE, ECE or DOT
- Extra CANbus modules may still be required on some vehicles

9007/HB5

880 & 881

LED Bulb Kit Warranty

2 Year - Standard Driving Conditions:
For normal day to day driving & recreational 4X4

LED Bulb Kit Contents

2 x LED Headlight Bulbs
